JOHNNY DUFFY

At The Mighty Wurlitzer Pipe Organ

From the time that we were three years old we were probably enthralled by the huge whirling music box in the center of the park . . . the bright lights blurring past and blinding us to all but the friendly horse that our dotting parents set us tenderly astride and strapped us on.

But then overpowering the visual delights were the awesome sounds of the booming bass drum and the simulation of a big brass band with the thumping tuba and a caliope thrown in for good measure . . . "Over The Waves" would start and the horse would commence his gentle gliding motion and you and ten generations of moppets the world over were beginning the most thrilling of all rides . . . you were on a carousel . . . !!!

How many of us have ridden those gilded chargers into battle with the forces of evil, or quickly swept a six gun off our hips to down the local sheriff, or laid our heads against the oaken ears and rooted our

stead home ahead of the pack, and, yes, . . . how many of us became so adept at fingering two or even three rings at a passage until it became a foregone conclusion that ours would be the *golden ring!*

And through all these adventures, even down to the bright-eyed grandparents nestled between the wings of the gargoyle-dragon and giving their minute grandson his first ride—one element always stood out above the rest . . . that thrilling *music of the carousel.*

To these memories and to the perpetuation of one of the world's most beloved experiences, John Duffy has dedicated his consummate artistry . . . in *CAROUSEL MUSIC IN HI FI*, Mr. Duffy puts us all back on the carousel of our childhood handsomely enhanced by Liberty's superb *SPECTRA-SONIC SOUND* . . .

Listen and breathe the exhilarating air of the park . . . reach for the cotton candy, the popcorn balls, the cokes, and, oh, yes—find a few nickels—the kids will want some rides . . . !!!

About Johnny Duffy . . .

Johnny Duffy is without a doubt one of the country's leading organists. He is equally at ease in the concert hall or as soloist in a swank supper club. As musical director for many of the major networks' top radio shows, he has brought many well-known themes to the ears of listeners everywhere.

Johnny is a true son of Erin, having been born in Kildare, Ireland. His youth, however, was spent in Turtle Creek, Pennsylvania, a little town near Pittsburgh. His musical background includes years of study with Walter Kelsey, Clarence Mader and Mario Castelnovo-Tedesco. The ability to play both semi-classical and popular music on the pipe organ and make it a thing of beauty is Johnny Duffy's greatest gift to the musical world.

ABOUT SPECTRA-SONIC-SOUND . . . LIBERTY'S SPECTRA-SONIC-SOUND is a process which incorporates the use of an advance design of the famed Telefunken microphone in conjunction with Altec Lansing power amplifiers and Ampex Recorders. This combination, plus special microphoning and studio acoustics, has been utilized to reproduce a brilliant sound. Correct balance between vocal and instrumental groups gives all LIBERTY recordings outstanding clarity and presence for maximum high fidelity listening enjoyment. For best results, use the RIAA equalization curve. Frequency response is from 40 cps to 15,000 cps.

Producer: Simon Jackson • Cover Photography: Garrett-Howard • Engineer: John Neal
